≈ **155,200** sq. ft.

Warehouse, Stores & Construction
Delivery Services:

18,000 sq. ft.

Fabrication Shop:

18,000 sq. ft.

Chemical Storage Facility:

2,400 sq. ft.

Blasting, Coating & Testing Facility:

12,000 sq. ft.

Production Clean Room:

4,800 sq. ft.

External Laydown Storage

100,000 sq. ft.

Annual Client Inventory:

\$USD 40M

Inventory Accuracy:

> 99%

As an industry leader, we deliver safe and cost-effective warehousing solutions that reflect a superior understanding of our clients' risks and opportunities.

Our Supply Chain Management professionals bring over 50 years of unique experience to meet our clients' diverse challenges.

- **Materials Management**

Our approach ensures that we are purchasing to identify potential risks and minimize them through good supplier selection, tight contracts and proper supplier management.

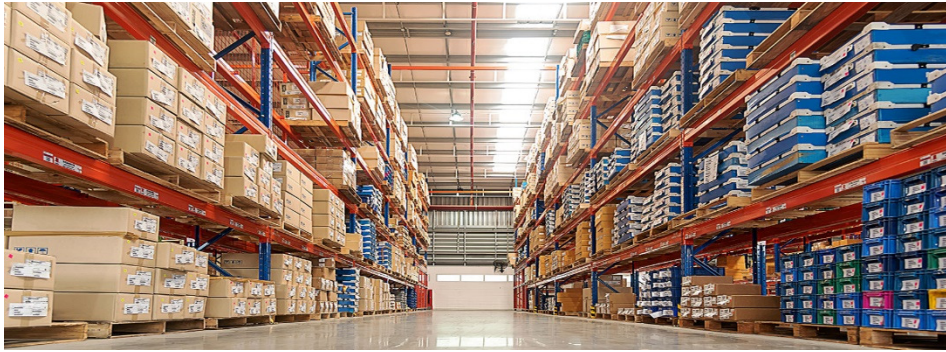

- **Subcontractor Management**

Our clients are guaranteed global best practice processes via the largest local subcontractor network using a One Team approach that assure an embedded HSSE culture and thorough quality and performance management audits and appraisals.

- **Warehousing & Logistics**

Our +10 years' experience includes the operation of a 210,000 sq. ft. warehouse facility. Clients rely on us to apply the best inventory and material tracking processes and can benefit from our new integrated facility for port proximity and economic rates.

Procurement Services

Built on open and consistent communication with all our clients and stakeholders, our Supply Chain philosophy ensures timely delivery of all materials and services in line with requested specifications, defined budgets and schedules. We leverage on the expertise embedded in our Wood global contracts to enhance and improve our purchasing prowess.

Key Differentiators

Client Partnerships	<ul style="list-style-type: none"> Partnering to deliver annual Collaborative Efficiency Savings – average US\$2.5MM per year (project delivery optimization, digitization, third party negotiations)
Collaboration	<ul style="list-style-type: none"> Supporting third parties on improvement plans where prequalification requirements were not met or gaps in performance observed Aiding the growth of local businesses by increasing contractor competence, maintaining high performance and operating standards
Ethics & Governance	<ul style="list-style-type: none"> Robust SCM Processes for third party engagements Contractor surveillances (audits, AML) Joint Tender Board Committee Ethics training for SCM resources
Risk Management	<ul style="list-style-type: none"> Risk management approach to work execution Lessons learnt embedded in contractor selection process Robust contract administration processes
Spend discipline	<ul style="list-style-type: none"> Weekly VOWD monitoring against budget and schedule Cost optimization through construction planning Benchmarking market rates & negotiation of saving

Preservation Strategy

As part of our core suite of Materials Management Services, we work with our third parties to ensure that Initial Preservation is conducted on all equipment/materials. This involves the application of preservatives, fitting of equipment protection and suitable packaging prior to delivery (damage prevention). Monthly, joint self-verification checks are conducted and observations tracked and reported via our HSSE system to strengthen procedural discipline.

Upon receipt at our integrated operations facility, our warehouse preservation services ensure that materials/equipment are stored in accordance with OEM guidelines to prevent damage or deterioration while stored and/or prior to installation.

With a detailed understanding of our clients' business needs, we can customize our facilities to cater to their storage requirements and optimize our workflow processes to eliminate errors and avoid rework.

By streamlining our operations to adapt to our clients changing needs in the global & local business environment, we are best equipped to provide a value-added approach to delivery.
